

AlvaForm Cleaning and Disinfecting Guide

Spray sanitizer with 75% ethynol / ethyl alcohol on the surface of the Alvaform evenly.

Allow the Alvaform to dry completely before use.

- Keep away from fire as ethanol / ethyl alcohol is highly flammable.
- Use a mildly damp cloth if wiping the Alvaform, avoid directly applying liquid to the surface of the Alvaform as this may cause the fabric to wrinkle.
- Do not use bleach on the Alvaform, this will cause discoloration of the fabric.
- Do not use other detergents or chemicals on the Alvaform.
- For more information, please contact your Alvanon representative.

Alvanon does not guarantee that these guidelines will eliminate the COVID-19 or any other virus from the surface of the AlvaForm.
