Introduction to this Series

The Alvanon Standard Series is a collection of regionally-specific sizing standards, developed by Alvanon's expert team of Consultants and Modelers using a combination of proprietary body scan data and global body, demographic, and population studies and data. Physical and Virtual AlvaForms are built using these standards.

The Hohenstein Women Standard has been developed in collaboration with the Hohenstein Institute, to reflect the actual posture, proportions, size, and shape of customers in the German region.
